MOHAMMAD OVAIS SHARIF

Full Stack Developer | React.js | Python | Node.js | TypeScript | AI-Powered Web Applications
UAE | +971 508129935 | sharifovais61@gmail.com | LinkedIn

CAREER SUMMARY

Full Stack Developer with 4+ years of experience, strongest on the frontend. Most recently at Jazal Engineering & Contracting in Abu Dhabi, I built and maintained responsive web interfaces, fixed cross-browser and mobile issues on existing pages, and built a Python FastAPI search service connected to the frontend. Before that, at SEED Global Education, I built the frontend for a study-abroad platform for students and university partners, including the screens on top of AI-powered search. I connect React and Next.js interfaces to Node.js REST APIs, work closely with backend and AI engineers, and I'm comfortable owning a feature from the UI to the API.

OVERALL SKILLS

Frontend :	React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Context API, HTML5, CSS3, Tailwind CSS, Sass, Bootstrap
Backend :	Node.js, Python, Express.js, REST API design, authentication (JWT)
Databases:	MongoDB, PostgreSQL
Testing & Tools:	Jest, React Testing Library, Git, GitHub Actions, Bitbucket, Vite, Webpack, Postman, Figma
Quality:	Responsive and mobile-first design, accessibility, cross-browser testing, performance (lazy loading, memoization, code splitting)

WORK EXPERIENCE

JAZAL ENGINEERING & CONTRACTING LLC

Software Engineer — **Mar 2026 - Sep 2026**

- Developed and maintained responsive frontend interfaces for the company's web platforms, focusing on usability, responsive design, and consistent user experience.
- Improved existing frontend interfaces by refining layouts, styling, responsiveness, and cross-browser compatibility.
- Maintained and enhanced existing web applications while ensuring reliable functionality across desktop and mobile devices.
- Built a Python FastAPI service that takes a search query from the React frontend

SEED GLOBAL EDUCATION

Software Engineer — **Feb 2025 - Jan 2026**

- Developed and maintained scalable, responsive web applications and internal admin dashboards using React.js, serving students (B2C), university partners (B2B), and administrative users, enhancing engagement and operational efficiency.
- Implemented dynamic, user-friendly interfaces for study-abroad search and application management, improving student navigation and onboarding experience by 30%.
- Led frontend integration of AI-powered features and live search APIs, enabling real-time information retrieval on universities, courses, and scholarships, reducing research time by 80%.
- Built reusable, accessible, mobile-first UI components, optimized for cross-browser compatibility and high-performance rendering.

- Applied React performance optimizations (lazy loading, memoization, code splitting) and error handling, resulting in faster load times and a robust user experience for high-traffic platforms.

GRAY MATRIX SOLUTIONS

Frontend Developer **Feb 2023 - Dec 2024**

- Developed and maintained responsive, scalable web applications using React.js, Next.js, JavaScript, Redux, Sass, and Bootstrap, following reusable component and modern frontend development practices.
- Translated Figma/UI designs into responsive, pixel-perfect interfaces, while focusing on performance optimization, cross-browser compatibility, accessibility, and consistent user experiences.
- Collaborated with backend, AI, and cross-functional teams to integrate RESTful APIs, manage application data and state, troubleshoot frontend issues, and deliver reliable production-ready web solutions.

MAK BYTE

Frontend Developer **July 2022 - Jan 2023**

- Developed and maintained responsive web applications using React.js, JavaScript, Bootstrap, CSS, and RESTful APIs, following reusable and maintainable frontend development practices.
- Built reusable React components and interactive user interfaces, with a focus on responsive design, usability, performance, and consistent user experiences across devices.
- Collaborated with clients, administrators, and cross-functional teams to understand requirements, improve application workflows, integrate backend APIs, and deliver reliable frontend solutions.

PROJECTS

Talkk.AI (Conversation AI WebApp)

Tech Stack : Next.js, Node.js, Sass, Bootstrap, TalkkCMS

- Developed intuitive and interactive chatbot interfaces using Next.js, Sass, and Bootstrap, resulting in a 35% increase in user engagement and improved conversation completion rates.
- Implemented reusable, modular React components for chatbot responses, conversation flows, and dynamic UI widgets, improving scalability and maintainability.
- Optimized application responsiveness and performance across various devices and screen resolutions, ensuring a consistent and accessible user experience.
- Collaborated with backend and AI engineering teams to synchronize data flow and align AI model outputs with frontend interface requirements for accurate real-time responses.

RMA QMS (Mortgage WebApp)

Tech Stack : React.js, Node.js, Sass, Bootstrap, Redux

- Designed and implemented reusable React components to ensure consistency across web pages and reduce development time.
- Translated complex Figma designs into pixel-perfect, responsive interfaces using React, Sass, and Bootstrap, ensuring 100% design accuracy and enhanced user satisfaction.
- Integrated RESTful APIs to enable seamless communication between frontend and backend services.
- Optimized React rendering and component structure, resulting in 20% faster page load times and smoother navigation across the app.
- Ensured cross-browser compatibility and responsiveness for web pages, optimizing for various devices and screen sizes.
- Utilized state management tools like Redux to efficiently manage data across the application, ensuring smooth and consistent user interactions.

School Management System

Tech Stack : React.js, Node.js, Bootstrap, CSS, Restful APIs

- Developed a comprehensive School Management Web App to streamline student data, attendance, and performance tracking for administrators and teachers.
- Built dynamic and reusable React components for dashboards, student profiles, and attendance modules, improving development efficiency by **40%.**
- Implemented responsive UI layouts using Bootstrap and CSS, ensuring seamless access across devices and enhancing mobile usability.
- Collaborated with academic staff and admins to refine workflows, improving overall system adoption and user satisfaction by 25%**.**

EDUCATION

Udemy

Sep 2021 - June 2022

Web Developer Bootcamp

University of Mumbai (Royal College of Arts, Science and Commerce)

July 2019 - July 2022

Bachelors of Commerce
